

Weekly Mentor Meeting: Every Sunday 2:15-3:15 PM

Our github repo: [acmucsd-projects/fa22-ai-team-3 \(github.com\)](https://github.com/acmucsd-projects/fa22-ai-team-3)

Meeting Time:

Attendees: Max, Chuong, Rebecca, Arvin (could not attend) , Siya (could not attend, stated her work in the first bullet point under “Summary of Meeting”), Rohan, Vincent

Action Items

-

Summary of Meeting

- Siya could not make it, so this is what she did:
 - The replit was not loading, so I made the changes in app.py (<https://github.com/acmucsd-projects/fa22-ai-team-3/blob/main/src/app.py>) and pushed it to github:
 - Before last meeting, I was able to load the dataset and make graphs based on it
 - In the most recent version (aka the version that is on github):
 - I am able to accept user input for hyperparameters
 - I’m still working on loading the XGBoost model into the code, since I’m running into errors importing the necessary modules.
- Arvin
 - Also having trouble loading replit
 - Learned and tested streamlit documentation :
 - Helpful resources:
 - <https://www.geeksforgeeks.org/a-beginners-guide-to-streamlit/>
 - https://www.youtube.com/watch?v=JwSS70SZdyM&ab_channel=freeCodeCamp.org
- We worked on installing Streamlit
 - Used Rohan’s device for installation

Timeline

- Get the app running
- What to have on the app:
 - Enable user application (An input box where user can feed the algorithm some info)
 - Spit results for the outcome.

- Have the model, pipeline, and the explanation of what they are on display.
- Overall, give some context of what we're doing.
