Summary of Meeting

- We went over the [slides](#)
 - Here are recommendations:
 - Slide 9 (Pipelines) should have more information about the final hyperparameters that we chose and maybe some pictures?
 - Slides 10- 23 are a lot of slides about models. Since the preso is only 5 mins, we can make it more concise by making it 3 slides:
 - Having one title slide for “models”
 - Slide 2: one sentence description for why each model didn’t work
 - Slide 3: XGboost (what it is and why we chose it)
 - Slide 25 (Demo): insert bit.ly for the streamlit app
 - Chuong is going to publish the streamlit app by the weekend
 - The github was cleaned (thank you chuong!)

Timeline

- On our Sunday meeting, we can go over the slides with Vincent and perhaps assign people slides to present?
